

- ❖ EnerWells Rental fleet offers a wide range of filtration and coalescing options to meet your project requirements.
- ❖ With our versatile fleet and stocked filter options, the EnerWells team is ready to deliver the equipment and filters you need, when you need them.
- ❖ We provide the consulting and engineering support to make sure you have the right equipment for your project and are on call for any troubleshooting or adjustments that may arise to keep your project moving forward.

Service	High-Flow Filter	Bag Filter	Pleated Coreless Bag	50 Mesh Strainer Insert	Liquid Liquid Coalescer	Block Carbon Elements
Amine/Glycol (GPM)	2100	2940	2940	2940	N/A	560
NGL (GPM)	3500	4900	4900	4900	875	700
Diesel (GPM)	1960	3360	3360	3360	525	490
Water (GPM)	2450	4200	4200	4200	N/A	560
Natural Gas (MMSCFD)	455	630	N/A	875	N/A	N/A

Assumptions: 2-2.5dP Clean, Flowrates are per 24" Vessel, 10 Micron, 0.65 SG Natural Gas, 950 PSIG Operations Pressure @ 100F

- Wide variety of filter media available
- Micron ratings from 200 to 1 micron
- Coalescing elements
- Strainer elements
- Pleated bag elements
- Traditional bag elements
- Vessels hold 7, 80" high flow elements
- 600 class ASME stamped vessels
- Lifting lugs or skids to maneuver easily onsite
- GD quick closure for easy filter changeouts
- Custom spare gaskets in stock
- Filter lube in stock
- Variety of smaller traditional bag houses available for rent
- 1480 PSI @ 100F
